

Log Builder Apprenticeship Training

Begins May 26, 2008 in Laxgalts'ap

Wilp Wilxo'oskwhl Nisga'a Institute (WWNI) and Northwest Community College (NWCC) are partnering with Arbor Vitae Log Craft to deliver the Log Builder Apprenticeship program in Laxgalts'ap, from May 26 to August 1, 2008.

Level 1 & Level 2 Apprenticeship

The Log Builder Apprenticeship program prepares students for employment in the log building trade. The curriculum provides a solid foundation for a career advancement and specialization in this field. Completion of the program is equivalent to Level 1 and Level 2 apprenticeship technical training.

Program Outline

The program utilizes practical construction projects to develop skills and knowledge in...

- primary, secondary and advanced log fitting techniques
- use and application of the industry's latest jigs and building systems
- roof and log truss building methods
- tool safety and equipment operation
- characteristics and dynamics of massive wood
- log selection procedures
- International Log Building Standards
- design, architectural and engineering considerations

More Training Opportunities

Short introductory Log Builder programs and workshops for apprentices currently working in the trade are available by request. Contact us today.
